Description of the Project As a Security Specialist and Division Security Officer with an Active Top Secret Clearance, I have experience in applying a wide range of physical, personnel, information, and industrial security for the operation and management of training's security program. I have monitored compliance with contract provisions for guards and fire alarm systems, and scheduled, conducted, and monitored training programs to make personnel aware of security matters and concerns. I have provided comprehensive security training and briefing for DEA's Basic Agent Trainees, Basic Intelligence Research, new employees, staff, and management. I have also conducted security training for DEA personnel regarding their responsibilities for the control and protection of classified information. Furthermore, I have developed instructions and procedures relative to risk management, threat assessment, disaster recovery, emergency planning protocols, and security officer post orders. I have implemented and overseen policies and procedures for the control and protection of classified information authorized for dissemination to representatives of foreign governments. I have conducted annual comprehensive physical security surveys that identify security compliance, and developed financial plans and budget proposals. I have managed the physical security lock program for assigned offices and buildings, developing and implementing procedures to ensure the maintenance of combination records for them. Additionally, I have experience in the development and coordination of antiterrorism meetings, including Threat Working Groups, Antiterrorism Working Groups, Antiterrorism Executive Committee meetings, and Protection Executive Committee meetings. I have also performed NCIC/NTLES criminal background check reviews and approved initials for access on the USMC Quantico Base, reviewed clearance packages for contractors and government employees in support of granting TR 3/TR5 clearance, and served as the DBIDS Program Manager for the DEA academy. Finally, I have conducted on-site vulnerability and threat assessments, demonstrating my ability to identify potential security threats and address them promptly. Client Name DOJ Drug Enforcement Administration Contact Name ASAC Eric Lee Contact Telephone No. 757-641-4943 E-mail Address Eric.S.Lee@dea.gov Project Title Security Specialist - United States Coast Guard Contract or Job Number Personal experience from the owner of Se7en Government Solutions Description of the Project The breadth of experience and knowledge I have gained in security management and training will be invaluable in running this contract. With my extensive background in developing and managing multi-disciplinary security programs, I have honed my skills in physical, personnel, information, and industrial security. My experience in providing security training and briefings for a variety of audiences, including new employees, staff, and management, will enable me to ensure that all personnel are aware of the latest security matters and concerns. My expertise in conducting security assessments and surveys, and my ability to identify security gaps and develop procedures to fill those gaps, will help to ensure that all security measures are up to par. Additionally, my experience in developing policies and procedures for risk management, threat assessment, disaster recovery, emergency planning protocols, and security officer post orders will be invaluable in managing this contract. I have experience in managing physical security lock programs for assigned offices and buildings, as well as coordinating antiterrorism meetings and serving as the technical expert for granting security clearances. Furthermore, I have experience in preparing comprehensive reports and briefings of inspections, identifying recommendations for improvements, and developing strategies to achieve compliance. With my experience in the United States Coast Guard, I have developed a mastery of security concepts, principles, and methodologies, including Intelligence-related security principles. I have applied this knowledge in the administration and safeguarding of national security information, with an emphasis on information security (INFOSEC), personnel security (PERSEC), physical security (PHYSEC), and industrial security. Overall, my experience and expertise in security management and training make me a highly qualified candidate for running this contract. I am confident that I can provide the necessary leadership and guidance to ensure that all security measures are up to par, and that all personnel are aware of their role and responsibility regarding security.
